Webflow · Framer
Git · Version Control

PROFILE

AI-native designer who ships intelligent, production-grade products at startup speed. I combine end-to-end UI/UX craft with hands-on front-end development — React, Next.js, Tailwind CSS, and shadcn/ui — and a fully AI-augmented workflow spanning ideation, wireframing, UX writing, and production-ready code generation. At Orfus India, I shipped 12 live SaaS MVPs in under 3 months across health, finance, education, and enterprise.

EXPERIENCE

Orfus India

Feb 2026 – Present

UI/UX Designer · Full-Time · Visakhapatnam, India

- Designed and shipped 12 live SaaS MVPs within a 3-month startup runway — Intranet, Research, Pay, Finance, HRMS, Workshop, Indent, Medilog, and Residence Management.
- Figma Make + Claude Code pipeline delivered production-ready React + Vite + Tailwind + shadcn/ui components directly from designs — developer rework reduced to near-zero.
- AI-augmented every project stage — Claude Design and Codex for logic, Gemini Image Gen and Freepik AI for generative visuals and UX writing automation.
- Delivered Laila Chairman Dashboard, Ganges School App, and GRIET Landing Page with complete design systems — all live in production.

Spotmies LLP

Nov 2025 – Jan 2026

UI/UX Designer · Contract

- Designed the ASRAM website — full visual foundation and component architecture for a multi-module SaaS ecosystem.
- Built a scalable design system (components, tokens, spacing, ally guidelines) cutting developer handoff time by 40%.

ClawTech

Sep – Nov 2025

UI/UX Designer · Internship

Skillto

May – Aug 2025

UI/UX Designer · Internship
